Text Adventure Solo Project – User Guide

Nicholas Vu

CS 462

Winter 2026

Requirements

Before you can play, ensure you have the following:

- Python 3.7 or later – download free from python.org
- A terminal / command prompt – Terminal on Mac, Command Prompt or PowerShell on Windows
- Git – Allows the ability to clone the repository into your local computer

Step 1 – Getting the Code

Using Git to clone the repository into your local computer and then navigate inside the newly created folder.

```
git clone https://github.com/nickkvu/Text-Adventure-Solo-Project-CS46X.git
cd Text-Adventure-Solo-Project-CS46X
```

Figure 1: Git Clone Command

Step 2 – Launching the Game

In the Terminal/Command Prompt, run the following command:

```
python main.py
```

Figure 2: Python Command to Run main.py

This command will run the entry point for the game, and the title screen will then appear. Press **Enter** to start playing!

Troubleshooting*: If you see an error saying 'python' is not recognized, try python3 main.py instead. If you see No such file or directory, make sure you are inside the project folder before running the command.*

                    Press [ENTER] to Start!
```

Figure 3: Title Screen

Step 3 – Understanding the Game Screen

Once the game starts, you will see the arena grid and a HUD below it:

```

```

Figure 4: The Game HUD

Symbol Reference

Symbol	Meaning
@	You – the Player
E	Enemy bot – defeat all bots to win
X	Defeated bot – stays on the grid as a marker
I	Item/Weapon pickup – walk into it and pickup to equip
#	Wall – you cannot walk or shoot through the walls
.	Floor – open space you can walk on

Step 4 – Controls

Type a command and press **Enter** after each one. You can use short keys or full words.

Command	What It Does
W / Move North / Go Up	Move one tile up
S / Move South / Go Down	Move one tile down
A / Move West / Go Left	Move one tile left
D / Move East / Go Right	Move one tile right
Pickup / Pickup Item	Pick up a weapon on your current tile
Shoot + North / South / East / West	Shoot Up / Down / Right / Left
Help	Open Help menu
Q	Quit the game

Step 5 – How to Play (A Walkthrough)

Find the Item/Weapon

Look at the grid for the symbol 'I'. Navigate to it using W A S D. When your '@' player is on the same tile as the item, type 'pickup' and press Enter. The HUD will update to show Weapon: Blasters.

Move: W A S D  |  Shoot: shoot [direction]  |  Quit: Q

Player HP: 10  |  Bot HP: 3  |  Weapon: Blaster
Position: (7, 15)

You picked up the Blaster!

>
```

Figure 5: Picking Up Blasters

Locate the Enemy

Find the 'E' symbol on the grid. Note which direction it is from the player's position. For example, if the bot is above you, you will want to shoot north.

Eliminate the Bot

Type 'shoot [direction]' and press Enter. Each hit reduces the bot's HP by 1. The bot starts with 3 HP, so it takes 3 hits. You may need to reposition if the bot is not in your shot path.

Note: The Blasters have a fixed range, so ensure you are close enough to hit the enemy.

Move: W A S D  |  Shoot: shoot [direction]  |  Quit: Q

Player HP: 10  |  Bot HP: 2  |  Weapon: Blaster
Position: (5, 8)

Direct hit! Bot HP: 2

> shoot west
```

Figure 6: Decreasing Bot's HP After Successful Shot

Win the Room / Game

When the bot's HP reaches – it is replaced by 'X' on the grid and the HUD shows DEAD. Once all bots are defeated the game displays ***ROOM CLEARED! YOU WIN!***

Player HP: 10  |  Bot HP: DEAD  |  Weapon: Blaster
Position: (5, 8)

*** ROOM CLEARED! YOU WIN! ***
```

Figure 7: Win Screen

Tips For Playing

- Pickup the weapon first as that will be the only way to damage the bot
- If ‘Your shot didn’t reach anything’ appears, the bot is more than 4 tiles away. Move closer to the target.
- Walls back shots. If ‘Your shot hit a wall!’ appears, reposition so the bot is in a clear line.
- Type ‘help’ at any time to see a full list of commands
